

Jyotiranjana Ghibila

Full-Stack Web Developer

+91-77352-85611 | ghibilamohan@gmail.com | github.com/jyotiranjana | jyotiranjana.dev | linkedin.com/in/jyotiranjana | Gurugram, Haryana

TECHNICAL SKILLS

Front-end: React.js, JavaScript, TypeScript, Redux, Next.js, React Query, HTML, CSS, Tailwind CSS, Webpack
Back-end: Node.js, Express.js, Mongoose, MongoDB, NoSQL, Cosmos DB, REST API, Microservices
Tools & Technologies: Git, GitHub, Postman, Swagger, JWT, Azure AI, Selenium Web Driver, Puppeteer, Web Crawling, Web Scraping

EXPERIENCE

- Arencss** | Associate Software Developer 11/2024 – 11/2025
- Developed a scalable case management system using React, Redux, Node.js, and REST APIs, enabling legal teams to search pan-India eCourt data for pre-summon verification.
 - Built an automation microservice with Puppeteer/Selenium to fetch real-time eCourt data by party name, CNR number, case type, advocate name, filing number, and ACT type.
- Epic Software Consultancy** | Associate Software Development Engineer 12/2023 – 11/2024
- Happy Techies:** Integrated LinkedIn, Microsoft, and Google authentication and built AI-powered job search using Azure OpenAI. Developed a Deno TypeScript cron job to track third-party job activity.
 - Intellisearch (Affine Analytics):** Built all frontend features for a GenAI-powered image management platform using React.js, Cosmos DB, and FAST API, enhancing tagless and tagged image search.
- Nolan Edutech Pvt. Ltd.** | Software Development Engineer Intern 06/2023 – 11/2023
- Interview Prime:** Collaborated on developing an AI-powered interview tool delivering real-time performance analysis and feedback.
 - Converted Figma designs into pixel-perfect responsive UI using Tailwind CSS with reusable components and design tokens.

EDUCATION

- Lovely Professional University (Online)** 12/2024 – 12/2026
- Master of Computer Applications (MCA)
- Masai School, Bengaluru** 02/2022 – 01/2023
- Software Development Program
- Siddhartha Degree College, Binka, Odisha** 07/2019 – 07/2022
- Bachelor of Science (B.Sc.) in Physics

PROJECTS

- Case Management System** | Live Link
- Built a smart case-tracking dashboard with advanced search filters and real-time updates, improving legal workflow visibility and decision-making.
 - Implemented automated eCourt data extraction using Puppeteer/Selenium, reducing manual search time for legal teams.
 - Developed scalable frontend and backend modules using React, Redux, Node.js, and REST APIs for seamless data handling.
- E-Commerce Platform** | Live Link | GitHub Repo
- Developed a fully functional MERN-based e-commerce application with product filtering, pagination, authentication, and cart/checkout flows.
 - Integrated secure payments using Razorpay and JWT-based user sessions for enhanced reliability.
- Collaborative Workspace App** | Live Link | GitHub Repo
- Built a real-time collaborative workspace enabling multi-user document editing, idea management, and file handling.
 - Implemented dynamic UI and reusable layouts using Next.js, TypeScript, Tailwind CSS, and Zustand.
 - Integrated Convex backend for live sync, improving collaboration speed and reducing data conflicts.
